

Non-native invasive plant species of the North Central Region

A Guide for FIA field crews

By
Cassandra Olson, Ecologist, USDAFS
and
Anita F. Cholewa, Curator at the J.F. Bell
Museum of Natural History
University of Minnesota

Acknowledgements

Special thanks go out to Anita F. Cholewa, Curator at the J.F. Bell Museum of Natural History Herbarium for getting this field guide started and for all her help along the way. Also thanks to David Haugen, John Vissage, Keith Moser, James Blehm, Dan Kaisershot, Travis Rymal and Ron Hackett for helping with my various requests as this guide was put together. Also thanks to Barb Winters for helping me find the resources to put this booklet together.

Forward

This field guide is intended to aid FIA foresters in the identification of a list of 25 predetermined species listed in Section 15.2NC of the North Central FIA 2.0 Phase 2 Field Guide. It is intended to be a document that can evolve as FIA evolves. For this reason, there are no page numbers and all species are arranged alphabetically by growth form (woody, herbaceous, etc.).

The first page for each species is arranged as follows:

Scientific name

Common name	NRCS PLANTS Code	NC species code
-------------	---------------------	-----------------

A picture showing infestation

A distribution map taken from NRCS PLANTS Database
