

People and Plants in Northern Maine: A New Curriculum Resource for Educators

<http://tiny.cc/d1ero>

OR http://nrs.fs.fed.us/sustaining_forests/conserv_ehance/special_products/maine_ntfp/

Bring your teaching home!

People and Plants in Northern Maine is a dynamic online resource based on results from a two-year study examining how Mainers use plants for food, medicine, craft, and more.

The website contains:

- Profiles of fascinating people in northern Maine who depend on wild plants
- Profiles of Maine plants, including traditional and modern uses
- Links to resources about wild plants in northern Maine's culture and economy
- Units and lessons designed and reviewed by K-12 educators

Visit the site today to download **FREE** PDF files of these curricular materials.

Here's what teachers are saying:

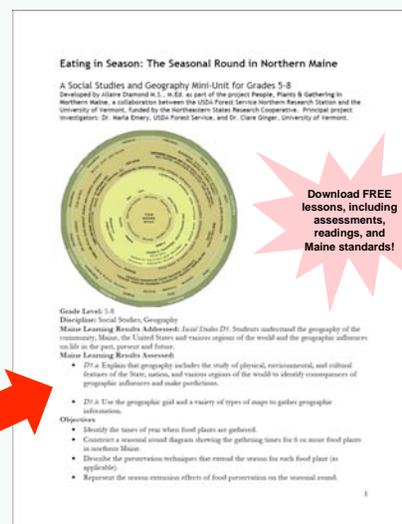

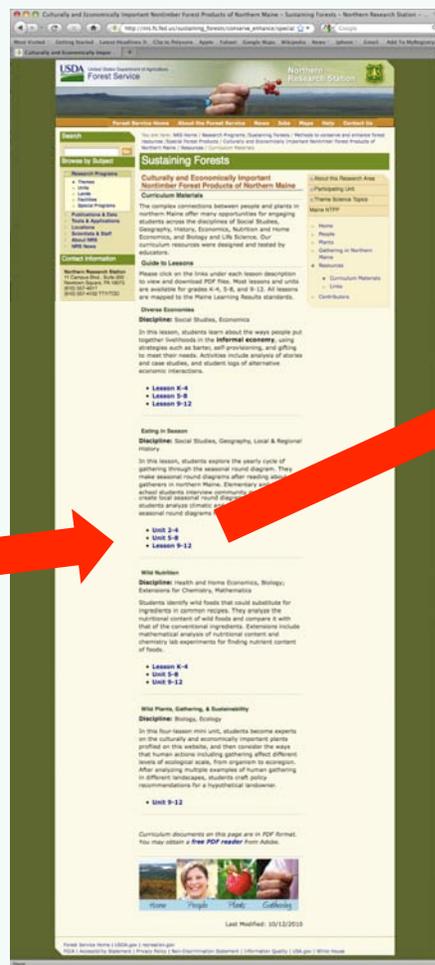

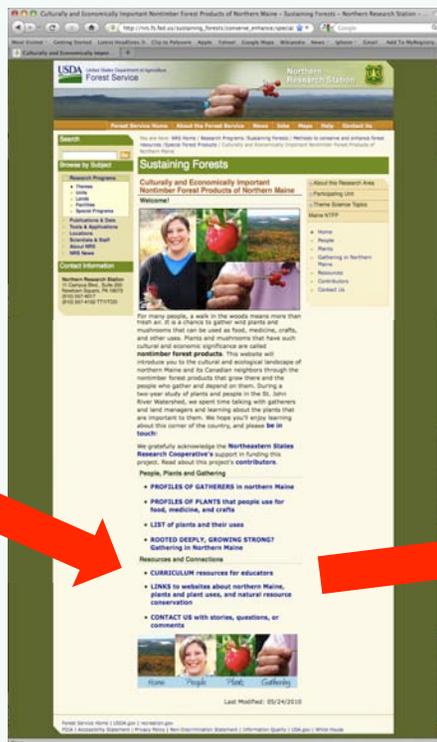

"The activities are very engaging and provide ample opportunity to involve [students] in active learning."

"This is a wonderful, comprehensive body of work."

"The background information and resources are excellent."

Mapped to Maine Educational Standards

- Social Studies
- Economics
- Local & Regional History
- Biology
- Geography
- Health & Home Economics

Download **FREE** lessons, including assessments, readings, and Maine standards!
